

**Handmade DNA: a tactile model to explore the basics of DNA**

# Activity 2: DNA replication question time

1. What is the purpose of DNA duplication?

---

---

---

2. What is used as a template?

---

---

---

3. Which strand is copied?

---

---

---

4. Does the process proceed in the same direction for the two strands?

---

---

---

5. Are the two molecules obtained similar or identical?

---

---

---

6. How were the old and new nucleotides distributed?

---

---

---

7. Is the sequence preserved?

---

---

---

8. Can mistakes be made?

---

---

---
