Review

Rigour – As far as you can judge, is the article soundly researched and/or argued? If not, please give examples.

Detail - Is the level of detail appropriate (readership=secondary-school science teachers)? If not, please suggest ways to make the article more suitable.

Length (optional) – Do you find the length of the article appropriate? If you think it is too long, please suggest how it could be shortened. If you find it too short, what would you like more information about?

Further suggestions (optional) – Do you have any other suggestions to improve the article

Recommendation

Please mark your recommendation below with an X. Note that all articles are carefully copy edited before publication, so there is no need to worry about minor language errors.

Accept the article	Accept the article after minor changes (listed above)	Consider the article again if resubmitted with major changes (listed above)	Reject
