Keys for observation

Sensory properties: softness, breathability, elasticity, smooth, crisp, matte, or shiny, warmth, coldness, sound.

Water absorption: if the drop stands at the surface, the water absorption is low. If the drop of water is immediately absorbed by the textile leaving behind a wet mark in the fabric, the water absorption is high.

Flame/Ash appearance: colour and size of the flames, velocity of burning, shape of the textile while burning, flying ashes or black melting residues.
